

# 28th International Conference on Information Systems Development

## 2<sup>nd</sup> Call for Papers

**ISEN**  
ALL IS DIGITAL!

We are delighted to invite you to submit a communication for the **28th International Conference on Information Systems Development** on the theme: "**Information Systems Beyond 2020**". The ISD2019 will take place at the Higher Institute for Electronics and Digital Training in **Toulon, France**, on **August 28-30, 2019**.

We call for communication proposals that aim to identify, investigate and reflect on key research and practical topics related to the main theme of **ISD2019**. Our interest is on attracting papers that are relevant academically but also contribute to enhance the information systems practice.

### Focus and theme

Phenomenal increase in computational power and IT development led to unprecedented increases in productivity and contributed to welfare increase in the capitalist economies over the last 40 decades. Hyper-connectivity has changed our day-to-day work and leisure practices; created new economic activities; and has transformed production, distribution and consumption in many sectors. However, the positive impact of hyper-connectivity is stained with online disinformation phenomenon, cyber-security risks, threats to privacy and personal liberties, data concentration in hands of a few number of technological companies. Other, global, challenges have not been in the focus of technology design and development, for example, environmental change, development, migration. The 28th conference edition provides momentum for the ISD community to self-reflect on where the IS research stands now and where it could go in the next decade to play a pivotal role in tackling global challenges in the next decade.

### Conference tracks

The ISD2019 conference, among other topics, focuses on:

- Society, Trust and Ethics in ISD
- Exploring New Media in ISD
- Information Systems Methodologies and Education
- Managing ISD
- Current topics in ISD

### Paper Submission

All papers will be subjected to a double-blind review. Deadline for paper submission is:

**April 1, 2019**

## Keynote speaker David Langley

David Langley is a senior scientist at the leading Dutch applied research organization TNO, Professor at the University of Groningen and columnist for the Dutch Financial Times. His work has appeared in leading academic journals including Journal of Product Innovation Management.

## Keynote speaker Daniel Kaplan

Daniel Kaplan is a futurist and entrepreneur. In the 1990's, he contributed to the Internet's development and evolution. From 2000 to 2017, he run the non-profit Think-&-Do-Tank Next-Generation Internet Foundation (FING). Since 2017 he has been working on the Plurality University project.

## Industrial track « Soft city »

Co-located with the scientific conference, a space gathering academic and industrial partners to imagine how the "hard" part of the city – i.e. data marketplaces and digital infrastructure will serve the "soft" part of it – people, processes and lifestyles. The track is sponsored by the Alliance for Internet of Things Innovation and the local partners Toulon Var Technologies and Toulon Provence Metropole.

## Prototype Exhibition

Use 300 m<sup>2</sup> to showcase prototypes developed during your research projects.
